Updates

Date: 7/17/2019 Status: Reviewed - Follow-up Required

Author: O'Gorman, Brian

Notes:

According to the report, 80 gallons of transformer oil (non-PCB) was released from a transformer.

Further follow-up needed.

Updated Volume: None at the time of this update

Date: 7/17/2019 Status: Correspondence

Author: O'Gorman, Brian

Notes:

Received several emails from the MDU contact with photos to show the incident location and cleanup of the site. Photos appear to show a complete cleanup of the area. Awaiting photo of transformer and non-PCB label. More follow-up needed. Photos and emails added to the incident folder.

Updated Volume: None at the time of this update

Date: 7/25/2019 Status: Correspondence

Author: Striebel, Ivana

Notes:

7/25/2019 - added a photo to the incident folder. This photo shows the name plate of the transformer and indicates that this is a non-PCB transformer release. Further action needed.

Updated Volume: None at the time of this update

Date: 2/9/2021 Status: Correspondence - More Follow-up Required

Author: Suess, Bill

Notes:

This spill involves non-PCB mineral oil. The Spill Investigation Program will retain oversight.

Updated Volume: None at the time of this update

Date: 3/4/2021 Status: Inspection - No Action Required

Author: Suess, Bill

Notes:

Inspected the site on 3/4/2021. The area around the transformer has been scraped up and no signs of impacts were observed. No further action is warranted.

Updated Volume: None at the time of this update
